(54) DOOR WEATHER STRIP ATTACHING STRUCTURE

(57)Abstract:

PROBLEM TO BE SOLVED: To improve adhering work and to prevent peeling of adhesion in a door weather strip attaching structure using both clip and double-surface adhesive tape.

SOLUTION: The base part 41 of a door weather strip 4A is fixed in a door opening edge 11 by a clip 5 in its car inside part and this base part is adhered to the door opening edge 11 via a both-surface adhesive tape 6 in the outer side of the car. Thus, molding paper peeling from the both-surface adhesive tape 6 during adhering is facilitated without being interfered with by the clip 5 and the floating of the end part of the car inside part of the base part 41 is prevented during closing of the door.
